

The figure consists of a 3x3 grid of subgrids. Each subgrid is a 3x3 grid of lines. The lines are oriented in four directions: up, down, left, and right. The orientations at the intersections of the lines in each subgrid are as follows:

- Top-left subgrid: Horizontal lines are up at the top and down at the bottom; vertical lines are left in the middle and right at the top and bottom.
- Top-middle subgrid: Horizontal lines are up at the top and down at the bottom; vertical lines are left in the middle and right at the top and bottom.
- Top-right subgrid: Horizontal lines are up at the top and down at the bottom; vertical lines are left in the middle and right at the top and bottom.
- Middle-left subgrid: Horizontal lines are up at the top and down at the bottom; vertical lines are left in the middle and right at the top and bottom.
- Middle-middle subgrid: Horizontal lines are up at the top and down at the bottom; vertical lines are left in the middle and right at the top and bottom.
- Middle-right subgrid: Horizontal lines are up at the top and down at the bottom; vertical lines are left in the middle and right at the top and bottom.
- Bottom-left subgrid: Horizontal lines are up at the top and down at the bottom; vertical lines are left in the middle and right at the top and bottom.
- Bottom-middle subgrid: Horizontal lines are up at the top and down at the bottom; vertical lines are left in the middle and right at the top and bottom.
- Bottom-right subgrid: Horizontal lines are up at the top and down at the bottom; vertical lines are left in the middle and right at the top and bottom.
