

The figure displays a 3x3 grid of 9 diagrams. Each diagram is a 3x3 arrangement of arrows. The arrows are oriented in various directions, including up, down, left, right, and diagonally. The patterns of arrows vary across the grid, suggesting a vector field or a flow on a discrete grid. For example, the top-left diagram shows arrows pointing mostly right and down, while the bottom-right diagram shows arrows pointing mostly up and left.
